## SUMMARY

Python & Django Backend Developer with hands-on experience through internships and freelance projects. Strong in building scalable web applications, REST APIs, and database-driven systems including e-commerce platforms and QR-based ordering solutions. Currently exploring Android development alongside full-stack web technologies.

## TECHNICAL SKILLS

Python, Django, REST APIs, HTML, CSS, Bootstrap, JavaScript, MySQL, Git & GitHub

Currently Exploring: Android Development (Kotlin, Jetpack Compose), React Native (Expo)

## WORK EXPERIENCE

### Python & Django Trainee – Grras Solutions Pvt. Ltd. (May 2024 – Nov 2024)

- Trained in backend development using Python and Django.
- Developed REST APIs, database models, and backend logic using MySQL.
- Worked on debugging, optimization, and secure backend practices.

### Full Stack Web Developer Intern (Online) – Unified Mentor (Dec 2025 – Feb 2026, Ongoing)

- Working on full-stack web development using Python, Django, and frontend technologies.
- Developing real-world modules, APIs, and integrated features in a remote setup.

### Freelance Web Developer (2024 – Present)

- Delivered 5+ freelance projects across e-commerce, business websites, appointment systems, CRM, and POS.
- Designed backend architecture, database schemas, and RESTful APIs.
- Built POS-style order flows, admin dashboards, and business logic modules.
- Handled project customization, deployment readiness, and client-specific requirements.

## PROJECTS

- **PoornimaX** – Dating & Social Media Platform for College Students (Django, MySQL)
- **Stack'd** – QR-Based Smart Ordering System for Cafés (Django, REST APIs)
- **E-Commerce Platform** – Online product ordering and management system

## ACHIEVEMENTS

- Winner, Sphinx Hackathon (24 Hours), MNIT Jaipur – Awarded INR 1,00,000 for building Voldio AI.
- Cleared Smart India Hackathon (SIH) college-level competition round.
- Secured top positions in multiple internal college-level technical competitions.
